

Maintenance Lot

The Maintenance Lot consists of the organized complex of assets, rights, know-how and resources, as identified below (the "Company Maintenance Assets"):

- organizational structure, certified by the National Civil Aviation Authority (ENAC), authorized to carry out the maintenance of products, parts and appliances, listed in the relevant specification of the authorizations, as well as to issue the relevant release certificates;
- contracts, goods and equipment relating to the operations of the above organizational structure;
- Air Italy manuals, approved by ENAC;
- the warehouse located in Malpensa and Olbia.

The detailed description of the Maintenance Lot and of the Company Maintenance Goods listed above will be made available through access to the virtual data room, to the entities who will be admitted to the same, in accordance with the tender.

The composition of the warehouse can also be verified through on-site access.

The Maintenance Lot does not include other contracts, goods or resources other than Company Assets Maintenance.

The admitted subjects may in any case extend the perimeter of their offer by drawing from the lists of goods and contracts that will be made available in the data room, as well as from further information that may be made available in the context of due diligence.
